Explanation: The projected revenues for FY 2008 are based on insurance premium tax history obtained from the Fulton County Finance Department and the State Department of Insurance. This historical data has been used to predict growth for the insurance premium tax receipts for all of unincorporated Fulton County, and then this amount has been distributed based on 2000 Census population figures. (Note: While the actual distribution process that will be utilized by the State does not exactly match this calculation process, the results should be approximately the same.)

In conjunction with the consideration of the FY 2007 Budget, preliminary revenue figures for FY 2008 were provided; an estimated amount of \$5,000,000 was included for insurance premium tax. This figure was based on the figure recorded by Fulton County for 2006 for the NE Special Services District. However, this amount was artificially high on a one-time basis because the City of Sandy Springs was not eligible for insurance premium tax in 2006 due to the time required to establish eligibility. Fulton County spread the "extra" receipts for 2006 across its three unincorporated Special Services Districts based on 2000 population ratios.
